FROG MINERAL SYSTEM

The **POOL FROG Cyclor** acts as the "water treatment center" and controls the flow of water through the system. **No extra plumbing. No electricity. No extra headaches!**

The **POOL FROG Mineral Reservoir**, which contains our EPA registered mineral formula and fits inside the Cyclor. The minerals continually replenish themselves for added protection against bacteria, as well as keeping your pool's pH balanced by acting as a neutralizer. One Mineral Reservoir will last the full season or up to 6 months. The complete **POOL FROG System** allows you to **cut chlorine use by up to 50%** over standard water treatment programs.
